SHELVING WITH SLOPED SHELVES

Rousseau shelving with sloped shelves provides superior-quality gravity flow storage that integrates perfectly with other products in our Spider® range. This unique product on the market is available in a wide range of dimensions to fulfill your exact requirements.

With an average slope of 15 degrees, sloped shelves are perfect for rear-loading applications (flow rack). These units help to create a "first in, first out" (FIFO) system. Shelving units without rear access are also available for more conventional storage.

Sloped shelves provide optimum visibility for items stored on shelves above the user's eye level. For shelves below this level, the extra angle reduces visibility of the shelf contents. If visibility is more important than flow in your system, we recommend installing lower shelves at right angles (SH20 / 21).

SPIDER® MINI-RACKING SYSTEM

With a wide range of dimensions and options available, industrial-quality Rousseau Mini-Racking units offer an efficient way to store bulky items in a scalable system that easily adapts to specific needs.

The Spider® Mini-Racking system is heavy duty, easy to assemble, and is the most versatile and complete solution of its type on the market.

Designed for intensive use, the system helps you to use the space you have available to its full potential, in areas such as warehouses, repair shops and distribution centers.

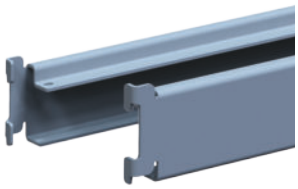

CUSTOMIZE YOUR MINI-RACKING WITH THE MYMODEL-R ONLINE CONFIGURATOR

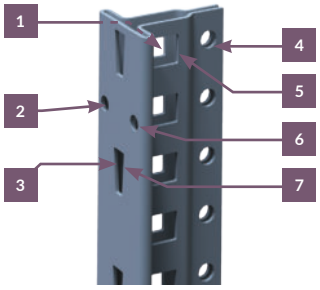

THE ROUSSEAU DIFFERENCE

Steel beams designed for several decking types: steel, wire mesh and wood.

The distinctive "claw" at the end of each beam hooks onto the front of the posts for extra structural rigidity and incredibly fast assembly.

The common post is compatible with Mini-Racking and industrial shelving.

Using a combination of modular drawers with a shelving unit joined to the Mini-Racking structure, bulky items and small parts can be stored together, see pages 91-92.

STEP 1: SELECT LEGS AND DIMENSIONS

A) Select the leg position: centered or cantilever (off-centered)
B) Select the desired height adjustment system: manual, crank or electric

Manual Crank Electric

C) Specify the workstation dimensions (width and depth)

LEG POSITION	WIDTH	DEPTH
Centered	36" / 48" / 60" / 72"	30" / 36" / 42" / 48"
Cantilever (off-centered)	36" / 48" / 60" / 72"	30" / 36"

NOTE: Adjustable height range of 15.75 inches.

D) Select the type of workstation: stationary or mobile

STEP 2: ADD A FRAME

Triple frame	60" / 72"	24" / 30" / 36" / 42" / 48"

Then select your crossmember options:

- No perforations
- With pneumatic connection
- With 6 x 15A power outlets
- With 5 x 15A power outlets and 2 x USB ports (1 A, 1 C)

5S AND WALL-MOUNTED STORAGE

Many Rousseau products are available in a wall-mounted version to help you organize and maximize your available space while keeping floors clear. Wall-mounting makes cleaning easier and everything you need is still within easy reach.

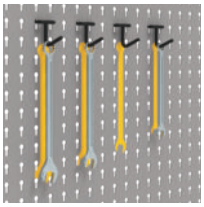

Over the years, Rousseau has also developed many different storage solutions to meet the standards of the 5S methodology. The aim of this Japanese technique is to continuously improve the work environment. Its name comes from the same first letter used to illustrate its five fundamental principles: Sort, Set in Order, Shine, Standardize and Sustain. It is designed to optimize organization and efficiency of the work environment by ensuring each tool is in the right place, easy to find and well identified.

A choice of 20 standard colors is also available to color code your 5S management.

RECORD STORAGE

With a Rousseau record storage system, wasted space is no longer a problem. Our shelving system was specially designed to accommodate all popular sizes of record storage boxes. Thanks to the design of the system's unique post, our system is also fully compatible with all other industrial shelving accessories.

Do you need more storage space than you originally thought? With catwalk mezzanines and deck-over shelving, our multi-level shelving systems could be exactly what you're looking for. Talk to one of our specialists to find a solution tailored to your unique requirements.

SRD8008

The unique and highly functional common post is the cornerstone of the structure. Its unique tubular T shape provides up to seven fixing zones for different applications. It also has a hollow center to prevent interference between sections.

Record storage units can be combined with the industrial Spider® Shelving System.

All vertical space can be put to use by combining the Spider® record storage system with two-level shelving.

Shelves are installed on the posts with compression clips. The beams hook onto the front of the post and can support steel, wood and wire mesh decking.

MANUFACTURING TOOL STORAGE SYSTEM

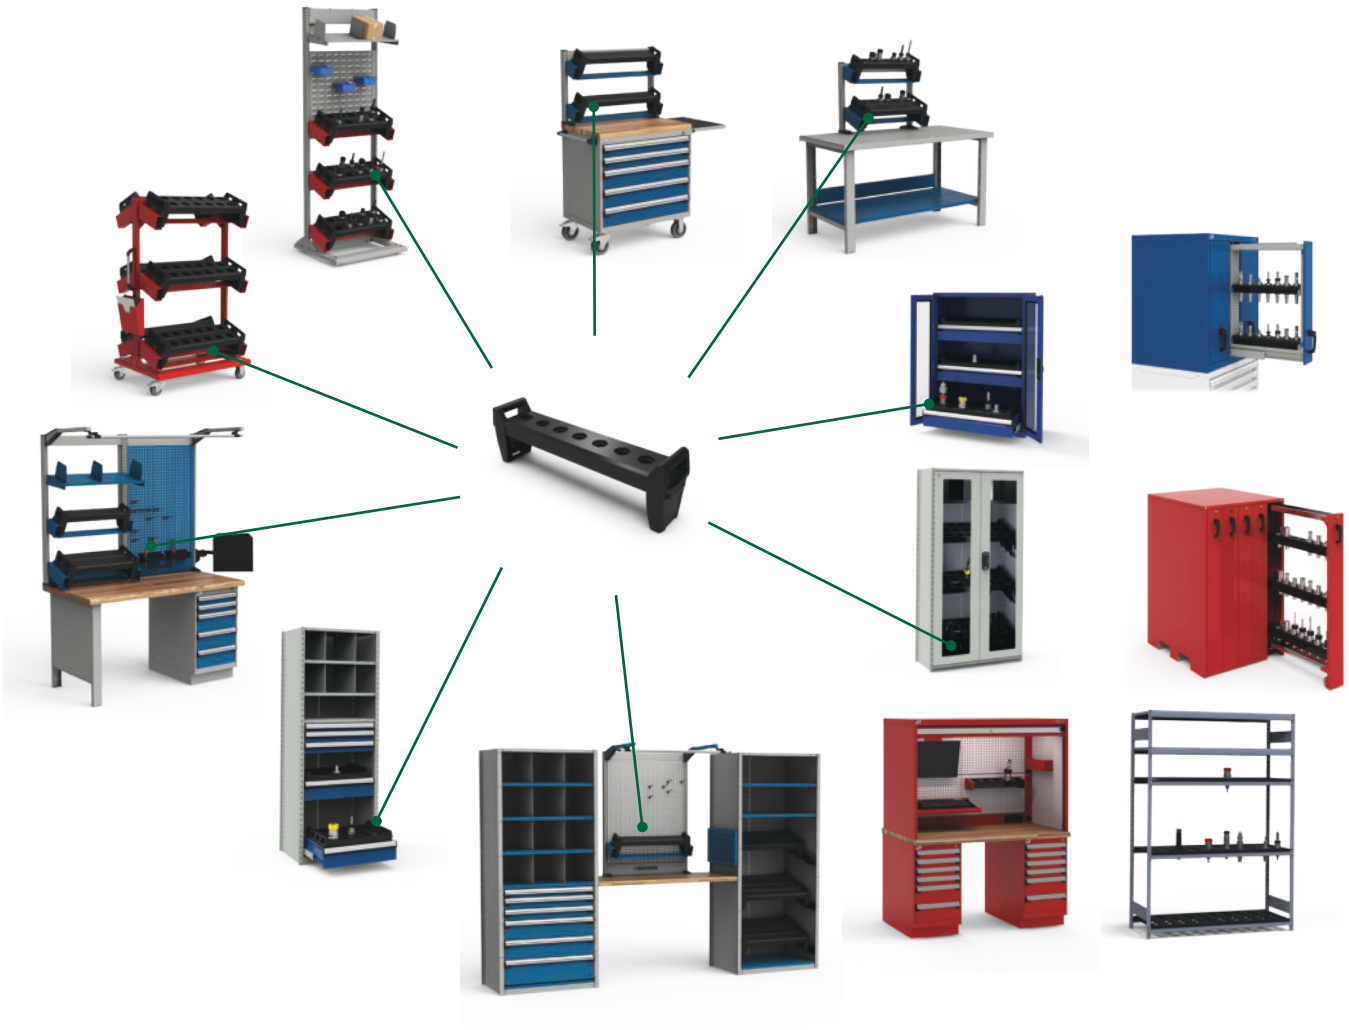

Manufacturing and processing steel (via machining, punching and bending) has been part of our business since 1950. Because of our vast experience in this sector, we fully understand the challenges associated with managing and storing the tools used.

These tools are a significant investment, so we have created a wide variety of storage solutions specially designed to provide maximum protection while optimizing and increasing the density of the storage.

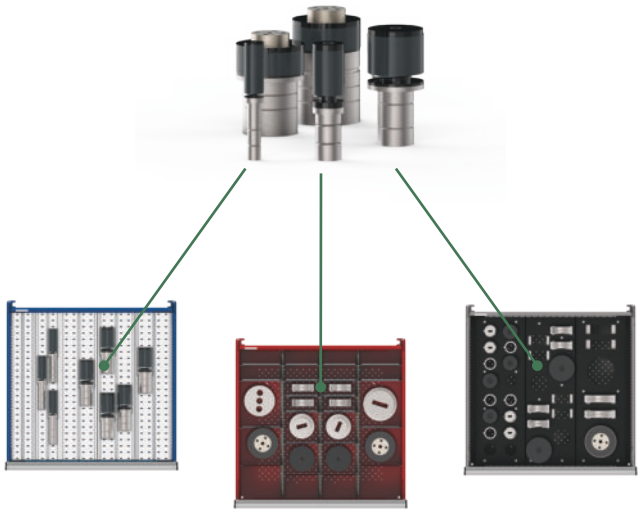

We have leveraged our tool storage expertise to develop storage lines for punching and bending tools.

Whether you work with all these tools or specialize in just one of these areas, we are sure you will find a Rousseau storage solution that meets your needs.

PUNCHING TOOL STORAGE SOLUTIONS

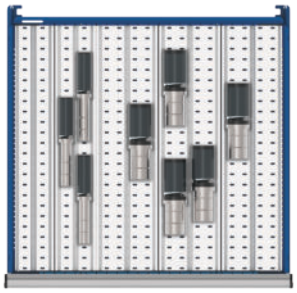

PUNCHING TOOL STORAGE

Rousseau's storage system for punching tools has been specially designed to provide efficient and organized storage for type A, B, C, D and E (thick turret) tools.

Whether you need to store your tools close to your machines, transport them for maintaining them (sharpening and lubrication), inspect them before using them, or perform quality control on manufactured parts, we have a solution for you.

To optimize and increase the density of your tool storage, we recommend three solutions depending on the type of punch and die you use.

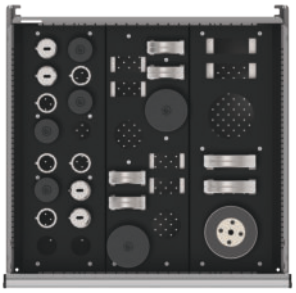

STORAGE TYPE	TOOL POSITION	TOOLS ASSEMBLED	
Storage trays	Tools lie flat	Assembled or non-assembled	A B
Partitions and dividers	Tools upright	Non-assembled	C D E
Punching tool racks	Dies lie flat or upright and punches are upright[1]	Non-assembled but grouped together	A B C D E

STATIONARY CABINETS

The tools used for bending sheet metal are heavy and come in many different shapes. To store them regardless of their shape, size or weight, we offer a reinforced RF62 tool drawer fitted with a RG07 structural partition. Extra structural partitions can be added as needed to increase the number of subdivisions inside the drawer. **See page 351.**

CHANGE CART

Change carts are used for a specific purpose. They are the link between the central store and tool cabinets, which are located next to press brakes, so the cabinets can be filled and emptied on a daily basis.

They have a wider wheelbase at the front of the cart to ensure perfect stability. The cart top has an ajustable tool tray and laminated hardwood top for easy tool preparation.

- Preconfigured cart models have 6" casters, including two rigid and two swivel casters with total-lock brakes, as well an integrated lock-in mechanism (A)
- All cabinets are fitted with a True One-Drawer-at-a-Time System
- 4 RF62 drawers (4"H) with RG07 partition
- 1 roll-out shelf (6"H)
- All cabinets include a standard cabinet key lock
- To add an L50 digital lock, see page 45
- To add an L100 smart lock, see page 45
- Two versions of ajustable tool tray:
  - o 02 (1" / 10): recommended for American-type tools. Hollow depth: 1 1/32"
  - o 01 (1 1/2" / 15): recommended for European, Wilson WT, Wila NS, Trumpf type tools. Hollow depth: 1 15/32"

NOTES: Refer to technical guide N55 to determine the tray best suited to your tool type.

The usable height of each drawer is 1" inch less than its nominal height. Refer to the usable width to determine the usable dimensions you will have for your tools.

Leave sufficient space for gripping your tools. We recommend 1½" on either side of the tool.

Always distribute the load evenly to prevent the change cart from tipping.

L3 KEY LOCK

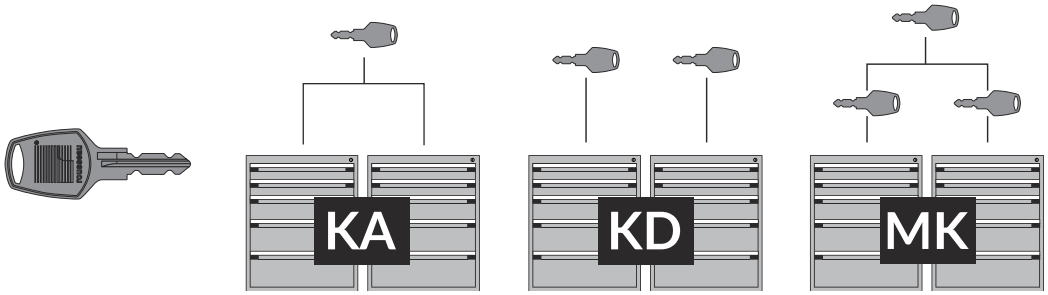

L3 KEY LOCKS

To ensure your work tools remain safe and secure, it's important to be able to lock your storage solutions when required. We have several key management options for different scenarios. For example, for ease of use, you may want the same key to open any unit; or perhaps, for extra security, you require different keys for each unit; or maybe you want different access levels based on seniority. For our L3 lock and key system we have three management types: identical keys (KA), different keys (KD) and a master key system (MK).

FOR ALL PRODUCTS AND COMPONENTS WITH LOCKS, SPECIFY THE TYPE OF KEY REQUIRED: KA, KD OR MK.

LP SAFETY HASP

A padlock and hasp is a versatile locking solution that works well in many different environments, such as workshops, warehouses and industrial installations. Thanks to its flexible design, users can choose their own padlock, which makes it easy to manage access without needing special keys. If the means to unlock is lost or forgotten, the padlock can just be replaced rather than changing the whole lock, ensuring constant security.

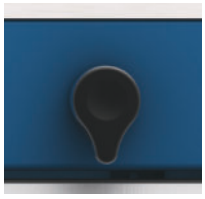

USE

LATCH LOCKED

When the latch is in the locked position, the mechanism prevents the drawers, door and security bar from opening, but it does not provide fully secure locking.

LATCH UNLOCKED

When the latch is in the unlocked position, all components can freely open without any locking restrictions.

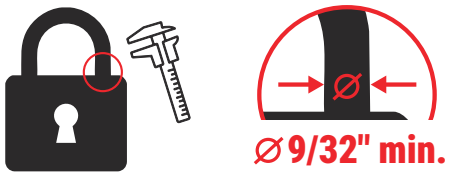

LOCKED WITH A PADLOCK

Adding a padlock fully secures the drawers, door and security bar.

NOTES: The images are provided for illustrative purposes only. The locked and unlocked positions can vary depending on the product.

The shackle of the padlock must have a diameter between 9/32" and 5/16".

NFC TRANSPONDEURS

The NFC transponder is an ideal alternative to smartphone access.

It is a physical object, doesn't need batteries and can be easily added to a key ring. In addition, the very short range of NFC transponders means they are very secure.

- Only Rousseau transponders are recommended for use with the L100 lock
- Also allows users with transponders and users with smartphones to all have access to the same lock

NFC transponders are not included with the lock. They must be ordered separately (pack of 5), see page 356.

SMARTPHONE AND TAPKEY APP

A smartphone is required for activating the lock and managing access rights.

The TAPKEY app allows users to unlock the lock. The lock owner can also use it t o add users and send opening permissions (access rights) to other users (smartphones or NFC transponders).

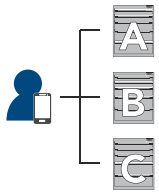

- Five (5) free users
- Option to add users ($)
- App available on iOS 11 and later versions and on Android 5.1 and later versions

ROUSSEAU'S COMMITMENT TO THE ENVIRONMENT

Rousseau is constantly seeking to minimize its environmental footprint. We have taken various measures over the years to meet this goal, such as using paint that produces no volatile organic compounds (VOCs), and recycling cardboard and scrap metal. By choosing Rousseau, you are choosing a responsible and environmentally conscious manufacturer.

HERE'S WHY

USING POWDER PAINT

For several years now, Rousseau has been using powder paint instead of liquid paint for all products manufactured. This significantly reduces emissions of CO_2 and eliminates several tons of hazardous materials. It is now the only type of paint used in the plant.

RECYCLING CARDBOARD AND SCRAP METAL

To do our part for the environment, Rousseau recycles all scrap steel and aluminum. It is sent to a processing facility and melted down for use elsewhere. Boxes and pallets are also sent out to be used for heating, among other uses.

Plastics are sent to a collection center.

OPTIMIZING VENTILATION SYSTEMS

Our ventilation systems have gradually been updated with automated controllers that reduce the amount of fresh air and heating needed.

REDUCING WATER CONSUMPTION

The plant has also reduced its water consumption by 90% thanks to an ingenious water cooling system.

USING PAPER SOURCED FROM RESPONSIBLY MANAGED FORESTS

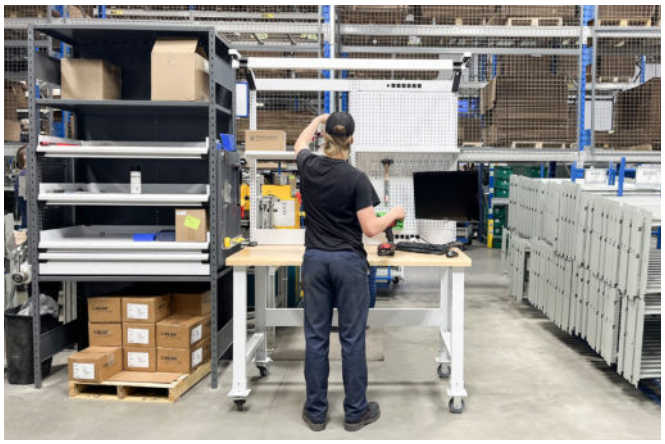

As part of our commitment to sustainable development, we prioritize the use of paper from responsibly managed forests and other controlled sources.

Rousseau is confirming its status as an industry leader by implementing these environmentally conscious initiatives.
