## INCREASE WORK SPACE AND STORAGE SPACE

Ferrari Lake Forest (IL)

Corner workstations allow for a more complete and integrated layout. They also help to optimize the space available for work and storage.

- Ergonomic 36" or 40" work surface height;
- Standard 30" worksurface depth;
- Choice of two configurations: with or without cabinet under the work surface;
- Leveling glides included in each model for a stable and level workstation;
- Designed to be placed against a wall or back to back;
- Must be anchored to two cabinets of the same height and depth, one on each side (RA30 or RA35).

To order, choose "WITH" or "WITHOUT" cabinet under the worksurface. Then configure your workstation. Options vary depending on the configuration chosen.
